Skillset

JavaScript *React* | CSS *Bootstrap* | Python *Django* | SQL *SQLite* | git *GitHub*

Technical Education

Nashville Software School

Software Developer - Student

July 2020 - January 2021

- Built out several client-side applications with CRUD functionality using **HTML**, **CSS**, vanilla **JavaScript** and the **React** framework
- Asynchronously accessed and manipulated resources via the JavaScript **Fetch API**
- Executed projects according to carefully crafted ERD specifications
- Set up mock RESTful APIs with **JSON-server** for rapid concept iteration
- Worked extensively with local and remote APIs, using **Postman** for request testing.
- Developed backend projects with **Python** and **Django / Django REST Framework**, employing **SQLite 3** for **SQL** database instantiation
- Followed Agile methodology in team settings, leveraging **git** with **GitHub** for industry-standard version control in sprint scenarios
- Learned remote communication skills through daily use of **Zoom**, **Slack** and related technologies
- Projects:
 - *Who He Play For?* Front End Project
 - Designed and implemented a multiuser game application in **React** framework, making use of functional components with **Hooks**, the **Context API**, **React Router** and **React Bootstrap** for styling
 - Formatted and presented remotely sourced content such as **YouTube Search API** results, embedded Twitter feeds and live sports statistics
 - Deployed test version available at hey-chuck-who-he-play-for.herokuapp.com/
 - Source code available at <https://github.com/gavinschriverv/who-he-play-for>

Professional Experience

The BE-Hive

Operations Manager and Web Admin

January 2017 - June 2020

- Engineered proprietary stock keeping and fulfillment systems by integrating Google Sheets, Gmail, **Shopify** and **Quickbooks Online** using **Zapier** automations
- Created weekly employee schedules and production plans for rapidly expanding small business
- Handled incoming sales across a range of channels, including wholesale accounts and online retail orders
- Updated and maintained company website on **SquareSpace** platform, using **CSS** and **JS** code snippets to extend out-of-the-box template according to brand details

Freelance Web Developer

2015 - Present

- Engineered and launched ecommerce websites from the **WordPress** codebase, tweaking look and UX with **PHP** theme edits and handling files via **FTP** tools such as **FileZilla** and **cPanel**
- Utilized **WooCommerce** for special requirements such as variable pricing based on user type
- Managed hosting and server arrangements in **GoDaddy** and **DreamHost**
- Navigated cyber security threats by tracking and blocking suspicious IP addresses in server access logs and made upgrades to eliminate preexisting vulnerabilities
- Wrote SEO-oriented headlines, meta info and body copy for landing pages that reflected best practices, such as appropriate length and keyword density

Education

Nashville Software School

Software Development Certificate

The University of Texas at Austin

B.A., English *GPA: 3.9*
