Technical Education:

Nashville Software School   2020 - Present

Developed the skills and technologies required to become a full-stack software developer. The core technologies learned in the Web Development course are HTML, CSS, JavaScript, with server-side Python and the Django framework.

Project: Created VacaPlus, a simple one-page application designed to help travelers keep track of places they've visited using technologies like React, React-strap, Javascript, and CSS.
VacaPlus: *Project Link*

Work Experience:

National Construction Rentals   2018 - 2019

Transported and constructed materials required to keep construction sites safe and within OSHA regulations.

• Worked in teams to get work done promptly.

• Operated and maintained Flatbed Trucks and Forklifts.

• Constructed chainlink and panel fencing ranging anywhere from 72 - 4000FT.

United States Army   2015 – 2018

Deployed to Iraq as a Combat Engineer with the 101st Airborne Division as part of Operation Inherent Resolve. Conducted dozens of route clearance missions and participated in many combined operations with Iraqi Army forces.

● Cooperated in the development and improvement of operating procedures and tactics for light infantry and engineer movements.

● Performed routine equipment and machinery audits ensuring all-important equipment was present and in proper working condition.

● Help facilitate the training of new soldiers in cooperation with Squad Leaders.

● Attended dozens of Safe Work Environment (EEO/SHARP) seminars provided by the US Army.

● Worked in a high pressured and stressful environment.
