GWYNNE MEEKS

SOFTWARE DEVELOPER

PERSONAL PROFILE

In transitioning my career, I was interested in finding something that fed my passion for creative problem solving. I was introduced to coding my a family member and through her I learned about the creative aspects of coding and the influence it has in our world. The more I learned, the more I wanted to become a part of that conversation.

NASHVILLE SOFTWARE SCHOOL 2020-2021

- Intensive boot camp for full stack development where students learn web development solutions in a real world setting
- Learning focused on client and server sides coding using Javascript, CSS, HTML, Python, Django, and Github for version control.
- Boot camp was entirely remote, allowing extensive team communication experience by utilizing Zoom and Slack

TECHNICAL EXPERIENCE

Anhedonia: Front End Individual Project
anhedonia-9e920.web.app

- Anhedonia is the loss of enjoyment in favorite activities. This app allows the User to define Activities to do and enjoy while also creating Journal Entries to catalog feelings about the experience to provide biofeedback for their mental health to see if the pattern of anhedonia emerges
- Single page, responsive CRUD app built using React, JavaScript, CSS, & Firebase
- Version control handled with Github

NUFFLE: Full Stack Individual Project
https://github.com/gwynnemeeks/nuffle-client
https://github.com/gwynnemeeks/nuffle-api

- League management dashboard built to allow Blood Bowl Players a way to track their teams, players, and league events.
- Single page, responsive CRUD app build using React, JavaScript, CSS, Python, & Django; Version control handled with Github

Walhom Park: Group Project
https://github.com/gwynnemeeks/nutshell-muntjac

- Code inheritance group project to practice web design and group dynamics using agile.
- First half of the project set up basic CRUD for an amusement park. Second half shifted code to other class teams to build new features on top of existing functionality to simulate a professional setting.
- Single page, responsive CRUD app built using React, JavaScript, CSS, & Firebase
- Version control handled with Github
